

E-mail templet:

Gentlemen,

JUNGHANS Microtec GmbH / JUNGHANS T2M SAS would like to implement an encrypted email-communication basis with your company.

For this purpose the encrypted software GNU Privacy Guard (GNUPG) which was developed in the context of the GNU privacy project (GNUPP) may be used or the encrypted software PGP. Admissible encryption systems are: 3DES (Triple-DES), DAS, RSA, EIG-E.

For further information, please refer to: www.gnupp.de / www.gnupg.com or www.pgp.com

To start preparing the implementation, we kindly ask you to send an email with the contents mentioned below to the following email address: pgp@junghans-microtec.de

We assume that you are NOT the correct point of contact in EDP issues which is the reason why we kindly ask you to forward this message correspondingly !

The said email shall contain following data:

1. Your full company mail address
2. The point of contact in your EDP department including:
 - name
 - firstname
 - department
 - phone no
 - email address
3. In case you should prefer an individual pgp-solution per workstation we would need following information

The points of contact from all pgp-communication users including:
 - name
 - firstname
 - department
 - phone no
 - email address
 - **the public pgp-codes from all individual user (as an email attachment to your mail !)**
4. In case you have already implemented a corporate solution for the PGP procedure we would only need the information required in items 1 and 2 PLUS the public pgp-code (as an email attachment to your mail)

With the help of this PGP-Code JUNGHANS microtec GmbH is able to configurate our PGP correspondingly.

In case of any additional question to this email please feel free to contact our EDP Department at any time.

Oliver Ginter, Fax: +49 7402 181 449, email: oliver.ginter@junghans-microtec.de
